DB LECTRO®

INDUSTRIAL CONTROL AND AUTOMATION

The industrial **control and automation** product category encompasses a wide variety of products used for industrial machine and process control, building and heating monitoring, spas, garage door control, and operator interface applications. These products typically feature a higher level of integration than similar component-level products and are designed to be used as functional building blocks and do not require further manufacturing steps, such as assembly onto a printed circuit board.

ELECTRONIC COMPONENTS

PRODUCT CATEGORIES

CAPACITORS	FREQUENCY CONTROL	POWER MANAGEMENT
CIRCUIT PROTECTION	INDUCTIVE COMPONENTS	SEMICONDUCTORS
CONNECTORS	MEMORY	SENSORS
DISPLAYS	OPTOELECTRONICS	TERMINAL BLOCKS
EMBEDDED SYSTEMS / IOT	PCB	THERMAL MANAGEMENT

A wide range of high quality electronic and electromechanical components
