

SERVING SECTOR OF

SECURITY

The field of **security** no longer deals just with core areas such as access control and surveillance but has moved toward adopting a holistic view of security solutions. Access control can be achieved in multiple ways: by means of electronic keys, but also with biometric sensors or via smartphone. Security and safety can go beyond surveillance through the proper use of sensors. The latter are not limited to the conventional smoke detector but include all sensors helping answer several security questions.

ELECTRONIC COMPONENTS

PRODUCT CATEGORIES

CAPACITORS
CIRCUIT PROTECTION
CONNECTORS
DISPLAYS
EMBEDDED SYSTEMS / IOT

FREQUENCY CONTROL
INDUCTIVE COMPONENTS
MEMORY
OPTOELECTRONICS
PCB

POWER MANAGEMENT
SEMICONDUCTORS
SENSORS
TERMINAL BLOCKS
THERMAL MANAGEMENT

A wide range of high quality electronic and electromechanical components
