#### **NOTE**

- 1. Ripple & Noise are measured at 20MHz of bandwidth with 0.1uF & 47uF parallel capacitor.
- 2. Hold-up Time measured at 90% Vout.
- 3. Please check the derating curve for more details.
- 4. Strongly recommend to conduct this test with DC Voltage. If customer wishes to test with AC Voltage, please disconnect all Y-Capacitors from Arch power supply.
- 5. Please secure the power supply unit to your metal case by using the four screw holes in the corners for either Class I or Class II equipment
- 6. The size of the suggested aluminum plate is shown as below. And for optimizing thermal performance, the aluminum plate must have an even and smooth surface (or coated with thermal grease), and ARF130 series must be firmly mounted at the center of the aluminum plate.

300 x 300 x 3.0 mm

- 7. CAUTION: Double pole, neutral fusing. Disconnect mains before servicing.
- 8 The ambient temperature derating of 3.5 /1000m with fanless models and of 5 /1000m with fan models for operating altitude higher.
