

WHO WE ARE

Flexxon designs, manufactures and markets Industrial NAND Flash Storage solutions and products, serving specifically the **CYBERSECURITY, INDUSTRIAL, MEDICAL & AUTOMOTIVE (IMA)** verticals.

TOP BRAND FOR
**CYBERSECURITY, INDUSTRIAL, MEDICAL &
AUTOMOTIVE (IMA)** market

Founded in 2001

HQ : Singapore

Industrial NAND
Product

Focus NICHE
Market

Offices in
Asia Countries

Sales Representative
worldwide

To Our Customer

To be your preferred & reliable partner for Flash Storage and Memory Solution provider

For Business Partner

Your valued & responsive business partner worldwide with your comprehensive product mix of memory solutions

To Our Shareholder

Continuously create value to achieve diverse, innovative product and unique supply chain solutions

To Our Employee

Provide conducive environment for personal development and fulfilment

SSD

PCI/SATA/ PATA
FLASH MODULE

USB DRIVE

CF/CFAST/CFX CARD

MICROSD/ SD CARD

USSD (BGA)
MO-276

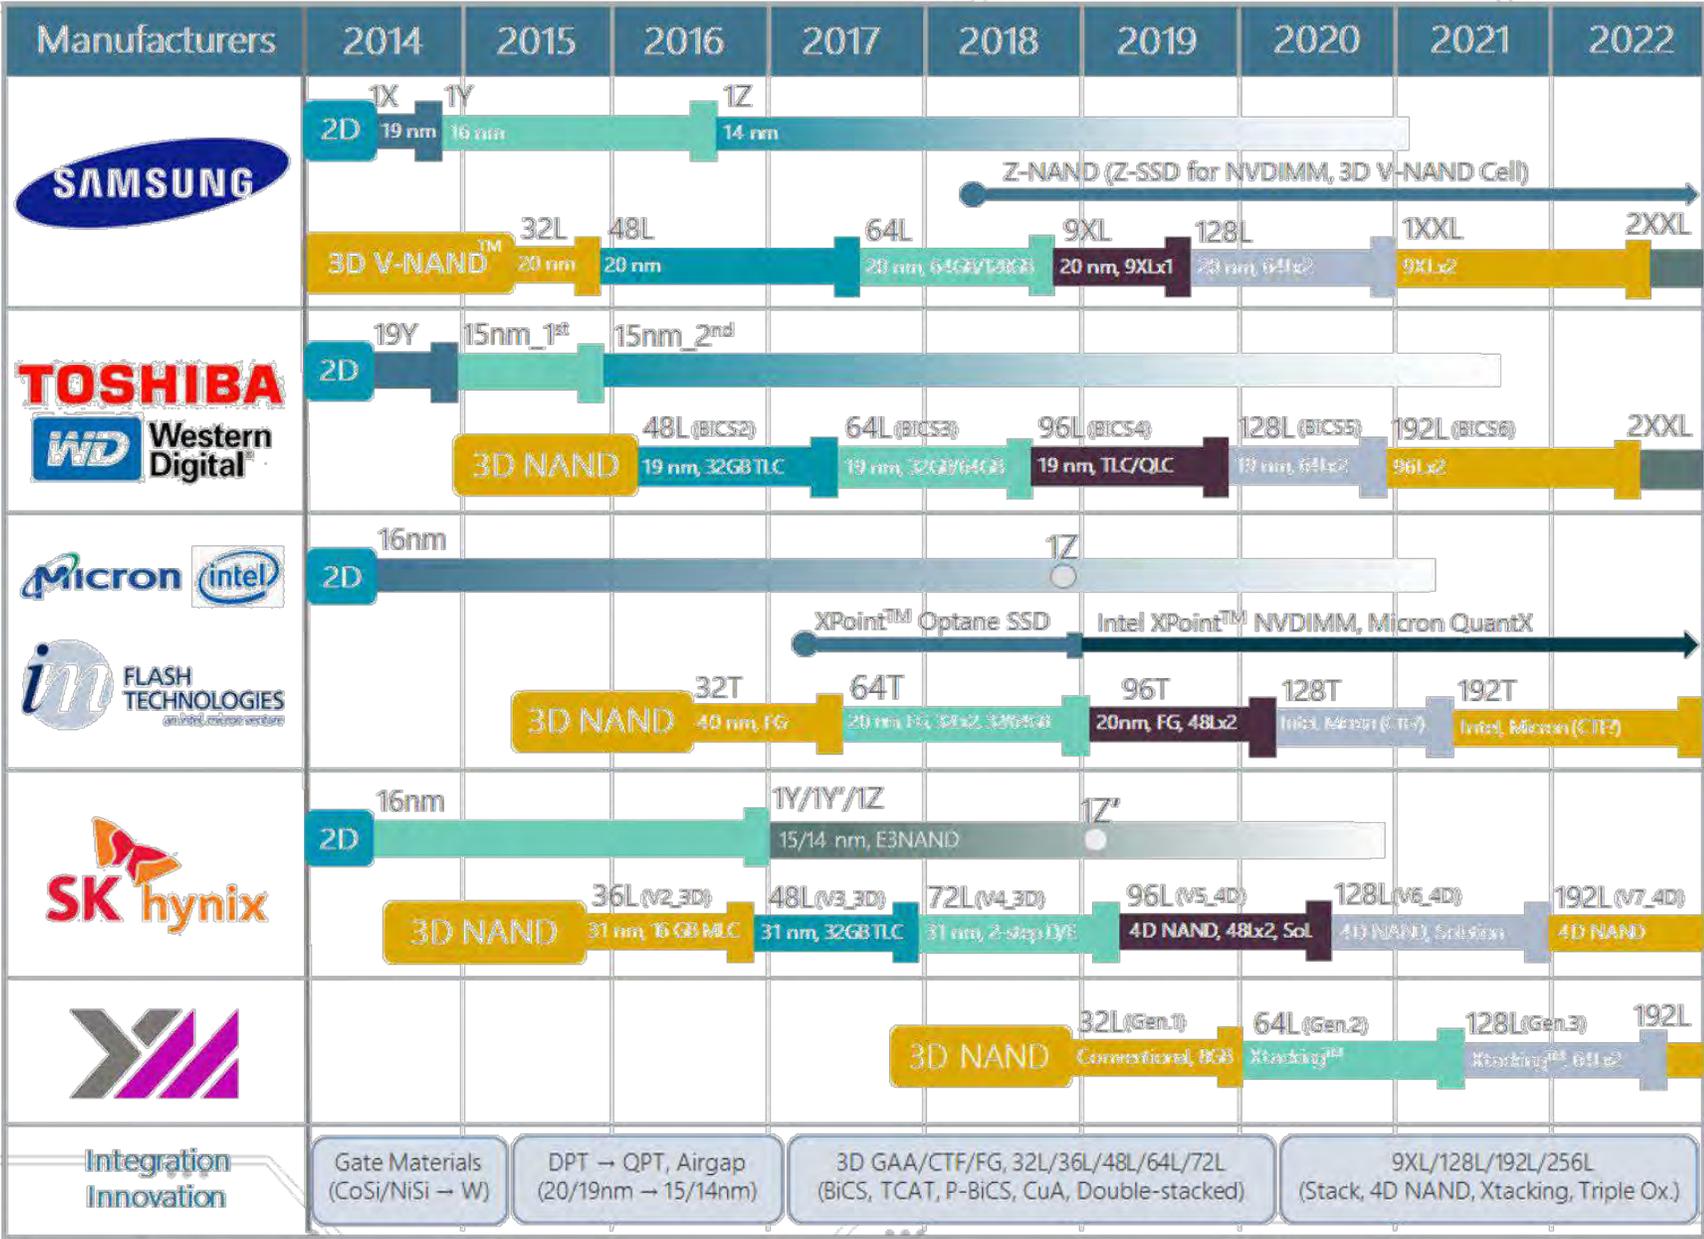

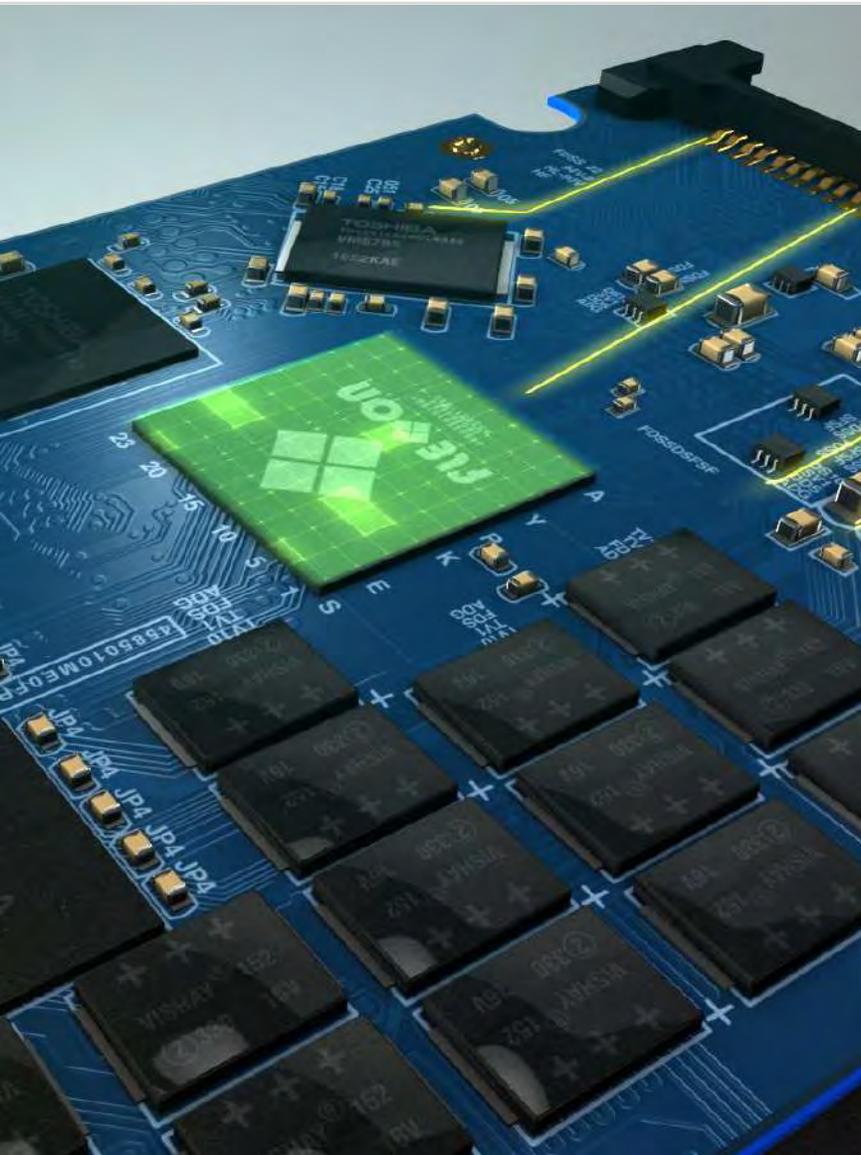

EMMC (BGA)

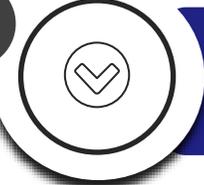

CUSTOMISATION

NAND IC Product Roadmap – Each Maker

-  10% of total memory market for CIMA Maker's focus on 90% PC/ Smart Phone market
-  Short memory life
Die change frequently
-  High Fluctuation -
Price / Allocation
-  Non-Fixed BOM

LONG PRODUCT LIFE

FIXED BOM

INDUSTRIAL GRADE

**SPECIAL CAPACITY &
CUSTOMIZE MEMORY
SOLUTION**

**STRONG TECHNICAL
SUPPORT**

**SUPPORT HMLV(HIGH-
MIXED LOW VOLUME)**

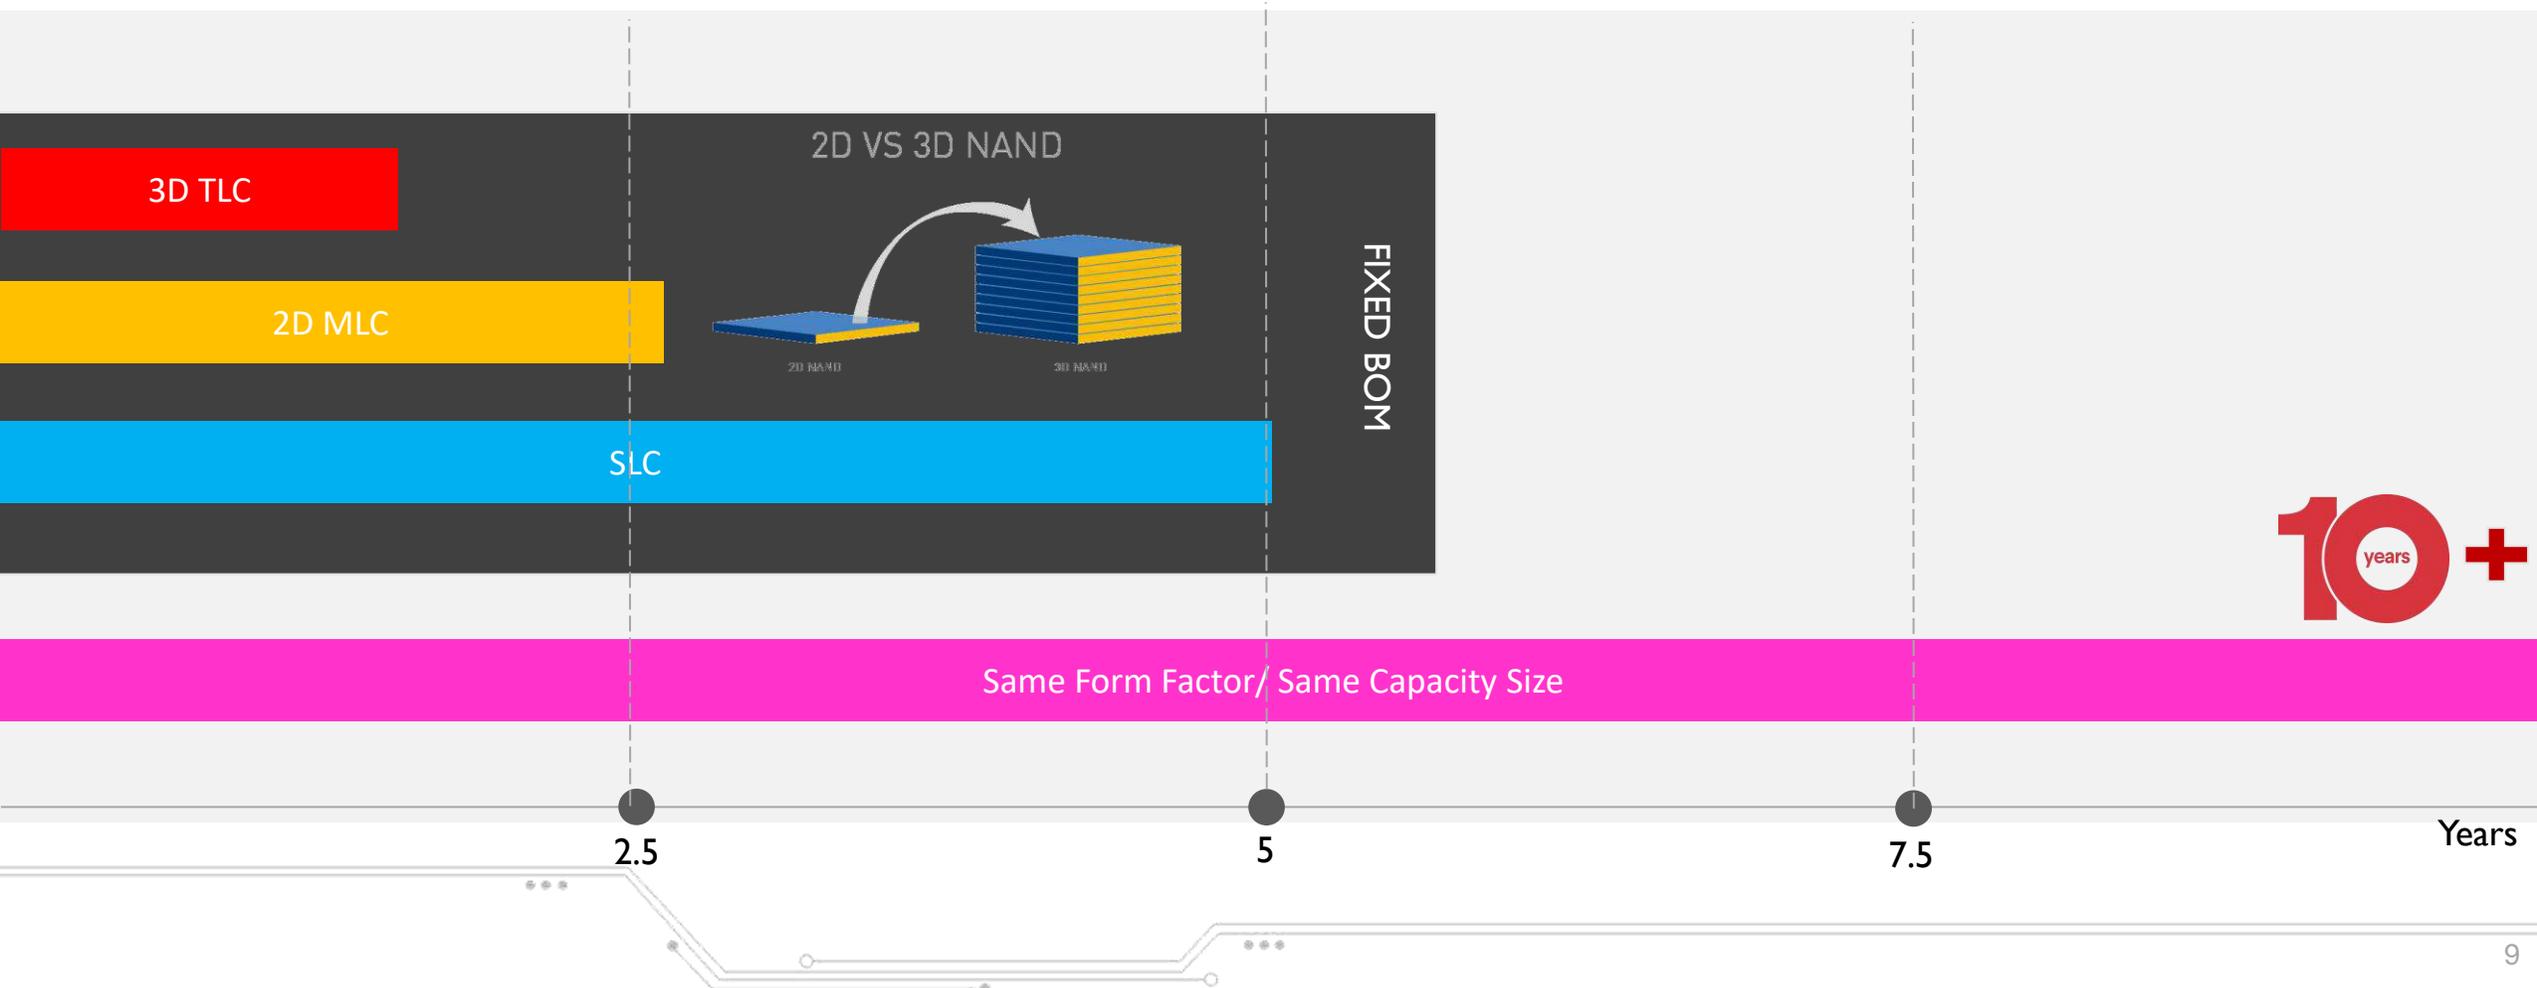

Longevity Assurance

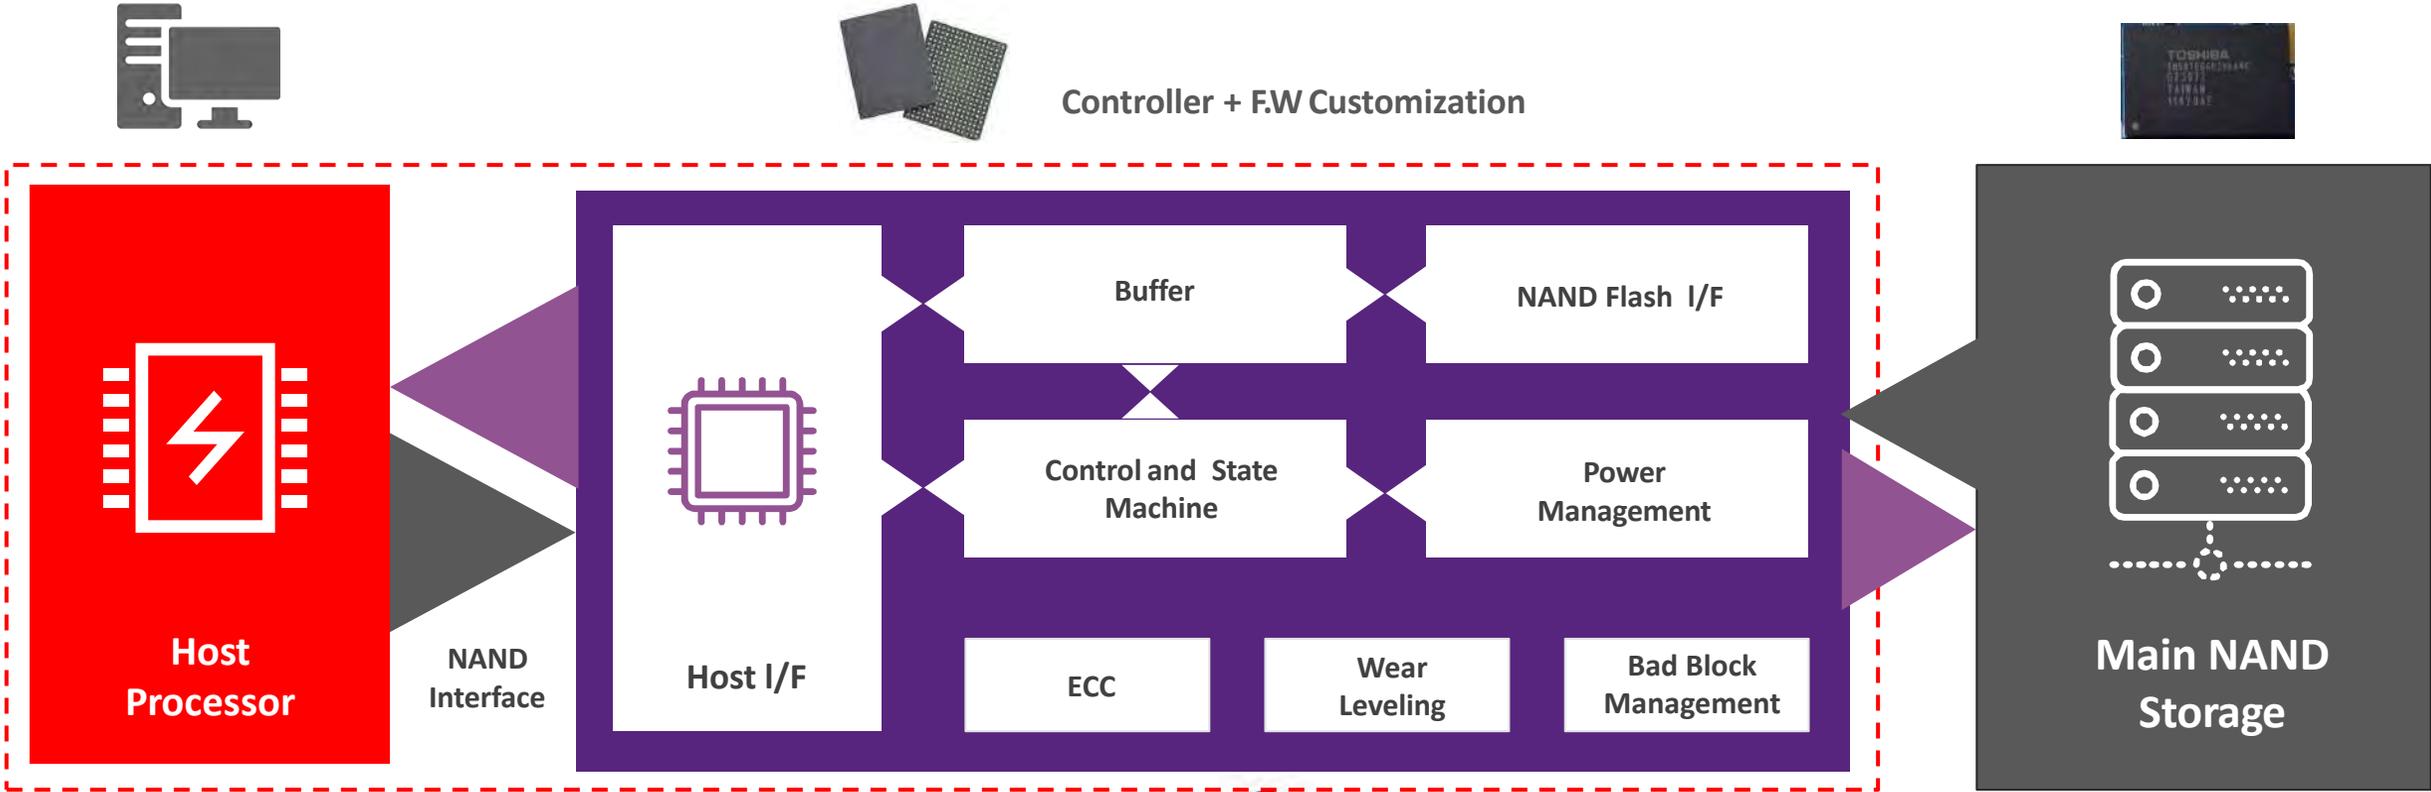

- We do not EOL any solutions
- A solution goes retired due to lack of demand of supported flash
- FLEXXON can assist extending the MLC life to 3-5 years
- To maintain supply, requires advance forecast / PO

- We guarantee same form factor / same capacity size.
- Life Cycle Support at least 10 years

Longevity Assurance – HOW?

Option 1 Only Fix Solution, NAND Die Change

No liability - Highly Recommended There's no need to update host controllers and related drivers every time the NAND goes through a die shrink, or storage capacity needs to be increased.

Option 2 Fix BOM Solution and Fix NAND (Same Die)

Customer need to provide forecast for buffer same die NAND Chip with liability

Comparison of Market Maker's Focus & Strength

STANDARD O/S

(Windows / IOS / Android)

High Capacity - 256 & above

Short Product Life Cycle

Non-Fixed BOM

Low Reliability / Durability

MASS MARKET

90%

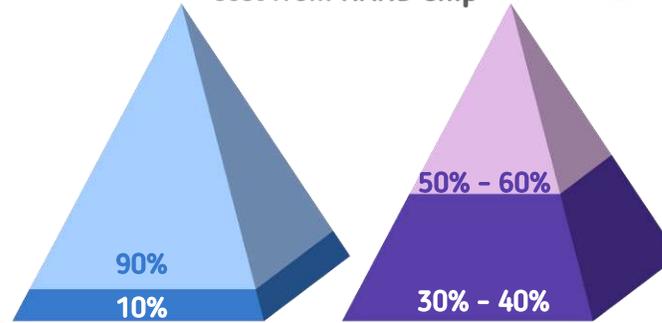

Total Memory Market Share

10%

FLEXXON'S NICHE - IMA MARKET

Cost Factor

Cost from NAND Chip

Cost from Controller / Solutions

EMBEDDED O/S

(Windows CE / LINUX / RTOS)

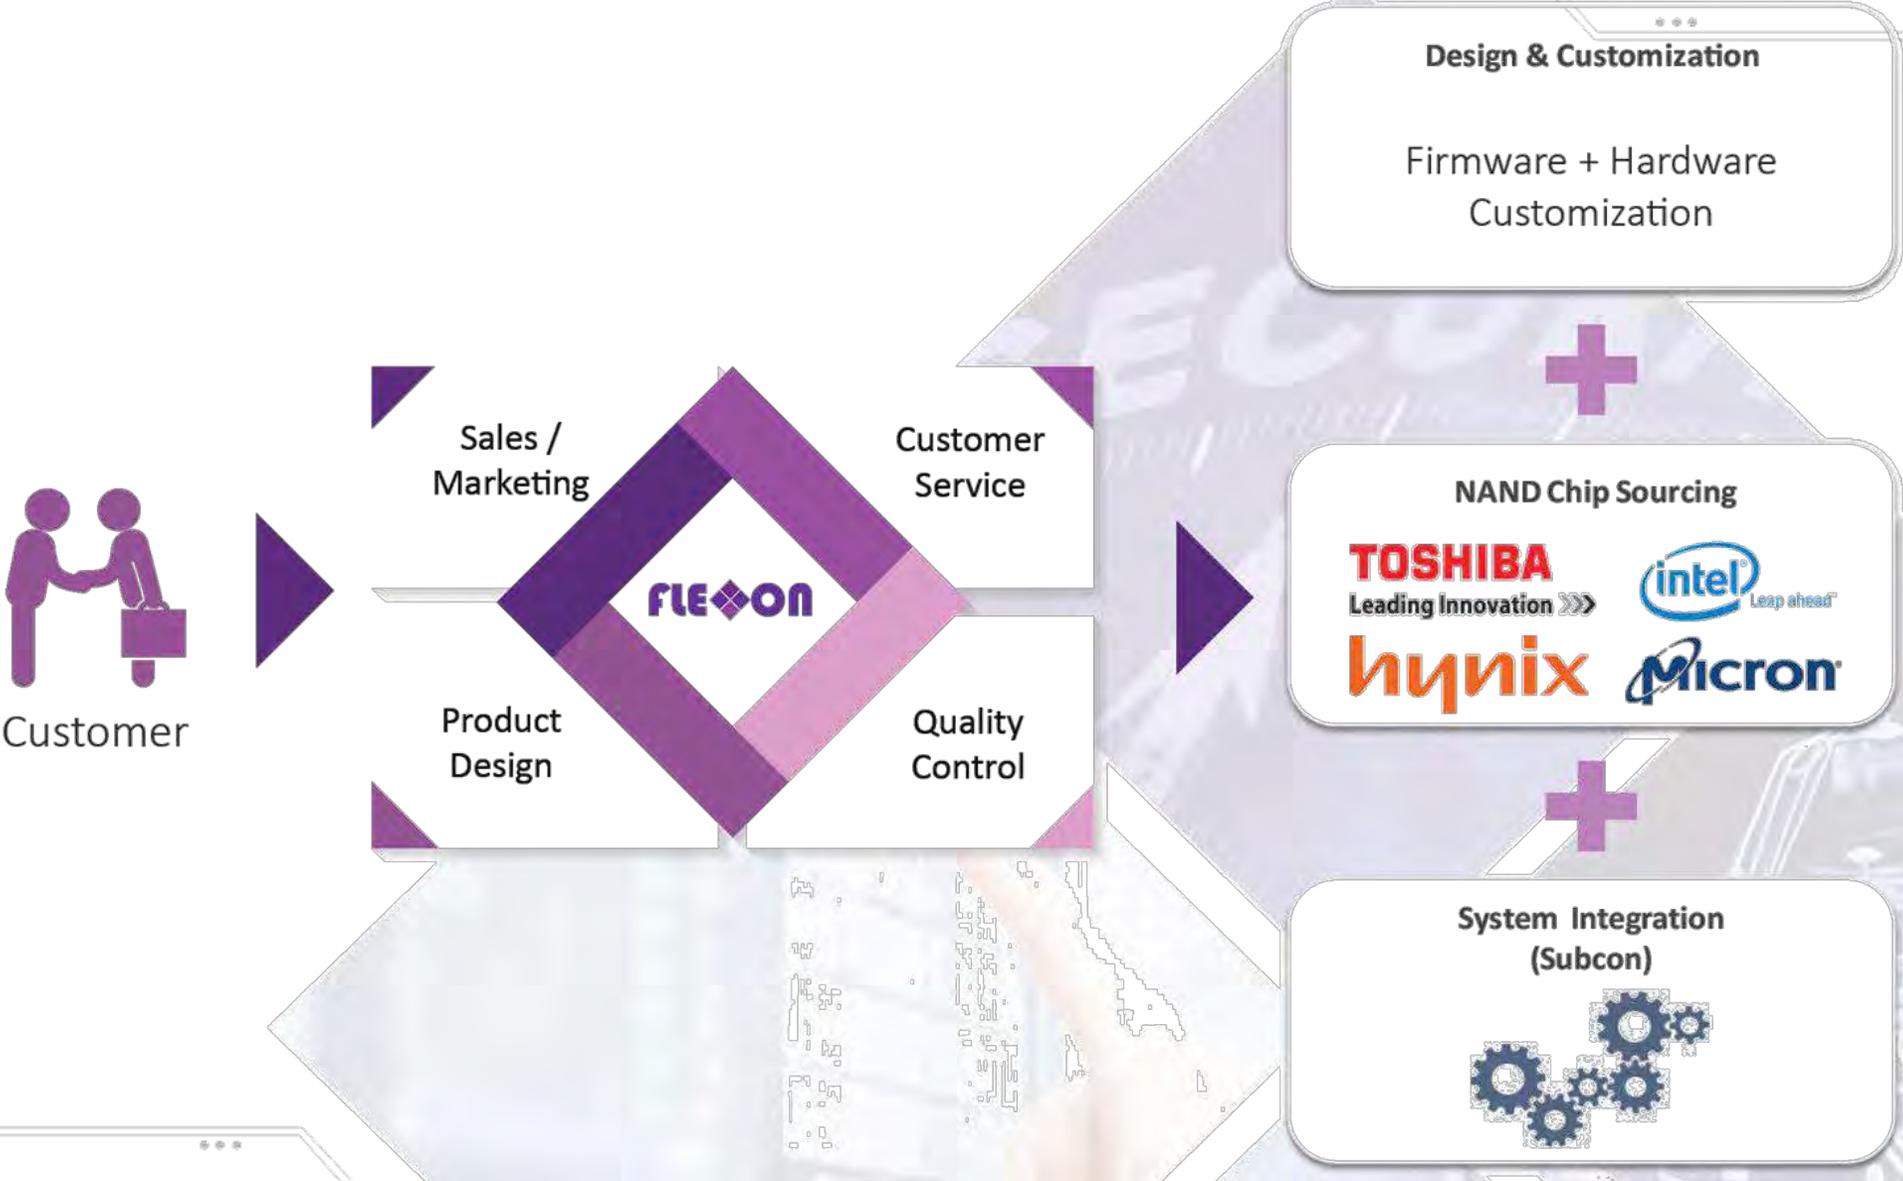

Low and Medium Capacity

Long Product Life Cycle

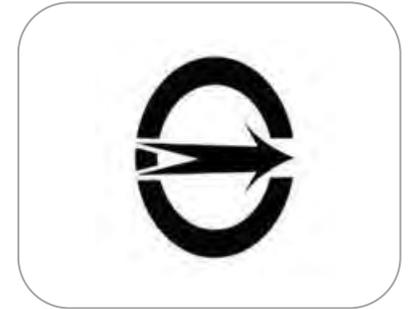

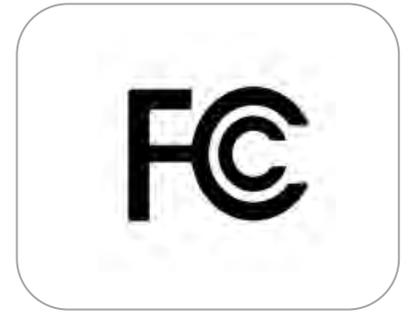

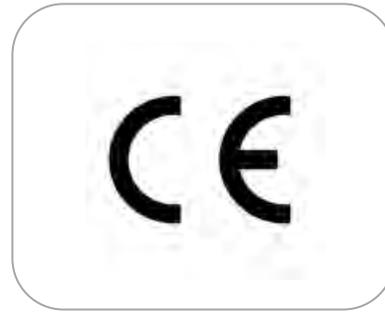

Fixed BOM

High Reliability / Durability

Our Business Model

Products Regulatory Certificates

Various Industrial Applications

Agricultural Machinery

ATM Machine

Automotive

Embedded System

Gaming

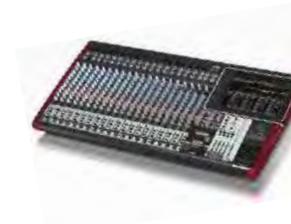

Handheld Devices

Medical

Military

Musical Instrument

POS Terminal

Rugged Computer

Security System

Solution Printer

Test & Measurement

Vending Machine

Top 5 Applications

Medical Equipment

- Apnea monitoring
- Cardiac Monitoring
- CPAP Machine
- Defibrillators
- Digital X-Ray
- Fetal Monitoring
- Life Science Laboratory Instrument
- Magnetic Resonance Imaging
- Medical Aesthetics Device
- Medical Wearable Device
- Patient Data Monitors System
- Ultrasound

Casino Gaming & Amusement

- Bar Top Gaming Machine
- Casino Gaming Machine
- Laser Tag Game
- Lottery Machine
- Pinball Machine
- Slot Game Machine
- Video Poker Machine

Networking & Telecommunication

- Media Server
- Network Performance Management System
- Optical Network Transport Solutions
- PBX
- Routers / Gateways
- Streaming Server
- VPN / Firewall
- Web Server

Security System

- Elevator Control
- Fire & Security Alarm
- Home Security System & Surveillance Camera
- Marine Safety
- Phone call recorder & blocker
- Street Traffic Management
- Time Attendance & Access Control System
- Voting Machine

AV System

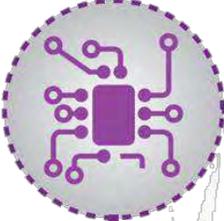

- AI Speaker
- A/D Audio Converter
- Broadcast Mixing Desk
- High End Home Theater Sound Processing System and Audio Equipment
- Music Instruments
- Network AV system
- TV Production
- Video Broadcasting
- Video Compressor
- Video and Sound Recorder

Customization Services

We are open for discussion for all customization services which is not listed here

Bill of Materials Customization

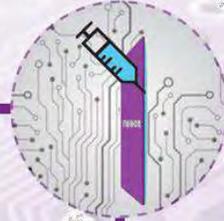

PCB Re-layout

Conformal Coating

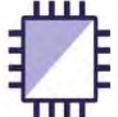

Firmware Customization

BGA Underfill

- Product ID / Parameters
- Pre-loaded Content
- Format Load
- Packaging
- Label Printing

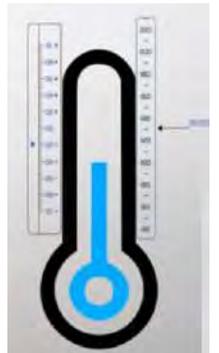

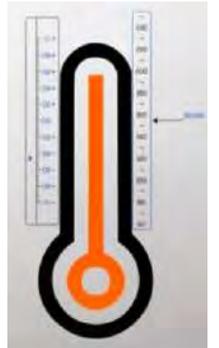

Temperature Grade

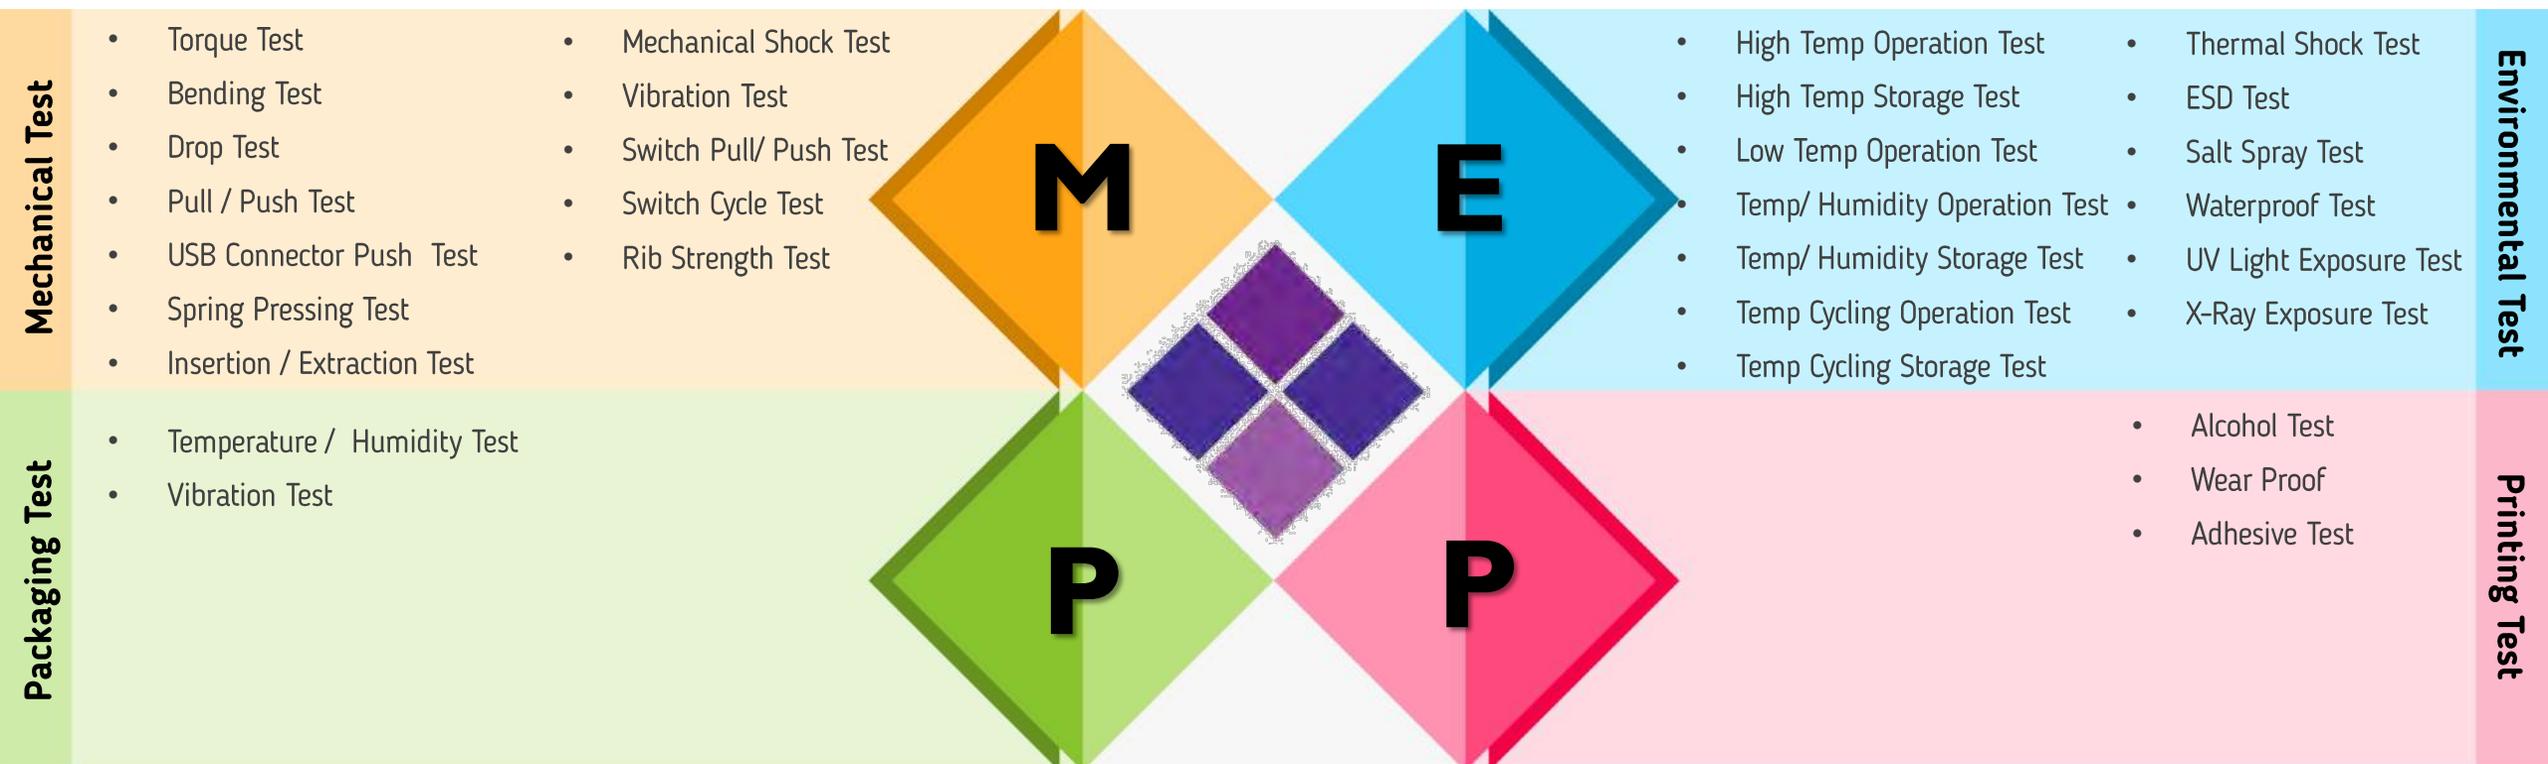

Industrial Grade	Temperature	Controller + FLASH
Automotive	-40° ~ +105° C	AEC-Q100 Grade 2
Automotive	-40° ~ +85° C	AEC-Q100 Grade 3
Diamond	-40° ~ +85° C	I-temp CTR + I-temp FLH
Gold	-25° ~ +85° C	I-temp CTR + Wafer Base FLH
Silver	0° ~ 70° C	I-temp CTR + C-temp FLH
Commercial	0° ~ 70° C	C-temp CTR + C-temp FLH

+85°C

-40°C

PRODUCT RELIABILITY ASSURANCE: RELIABILITY TEST

Pseudo SLC take advantages in terms of performance and pricing

Flash Technology	NAND Flash Type	Feature	P/E Cycle	W/R Speed	Price
2D NAND	SLC	Single-Level Cell	60,000-100,000	Best	Expensive
	pSLC	Pseudo SLC	20,000-50,000	Great	Between SLC and MLC
	MLC	Multi-Level Cell	3,000	Good	Cheap
3D NAND	3D pSLC	3D Pseudo SLC	20,000-50,000	Great	Close to MLC
	3D pMLC	3D Pseudo MLC	3,000	Good	Between 3D pSLC and 3D TLC
	3D TLC	3D Triple-Level Cell	1,000-3,000	Worst	Lowest

SLC : Performance

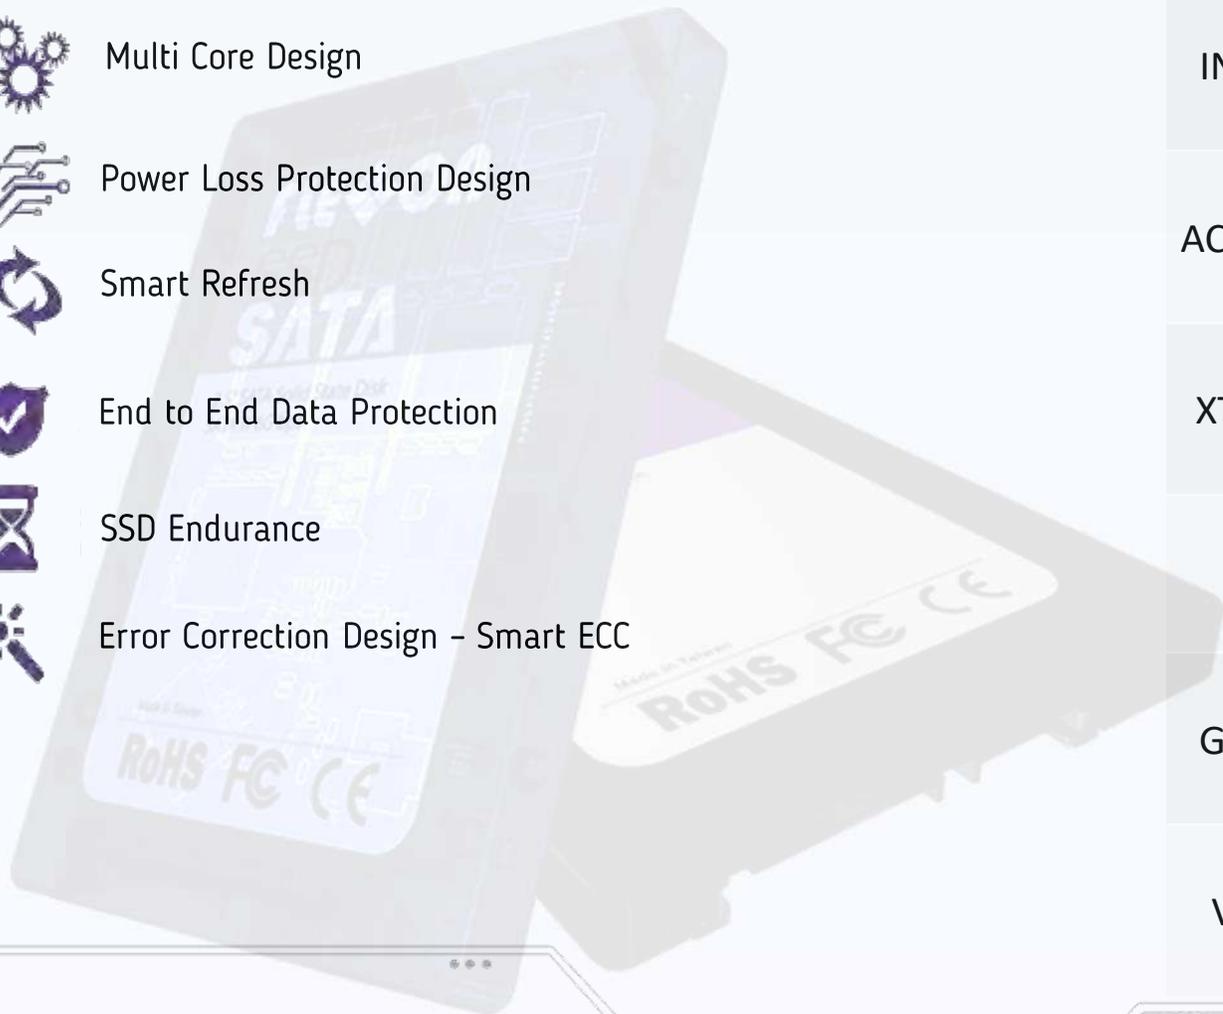

MLC/3D TLC : Cost

3D NAND : Mainstream

-  Multi Core Design
-  Power Loss Protection Design
-  Smart Refresh
-  End to End Data Protection
-  SSD Endurance
-  Error Correction Design - Smart ECC

SATA SSD	Application
INSPIRE Series SATA3	High Endurance & Wide Compatibility with 3D NAND Suitable for Multi-Tasking Applications Support Hardware PLP
ACHIEVER Series SATA3	High Performance & High Density Suitable for Main Storage Applications
XTREME Series SATA3	High Performance & DRAM-less design Perfect for Embedded Applications
XCEL Series SATA3	Ultra High Density & Ultimate Performance Competent for Enterprise Applications
GALAXY Series SATA3	Enhanced Reliability & Security Design for Military Application
VALUE Series SATA2	Low Cost & Low Density Ideal for Module and Embedded Applications

Industrial PATA & PCIe SSD Overview

Feature	Industrial / Commercial	Industrial / Commercial	Industrial / Commercial	Industrial / Commercial	Commercial	Industrial	Industrial	Industrial
Function	<u>Industrial Grade</u> Support Smart Tool (SD Life Monitor Tool) Support Auto-Read Refreshment Support Power Loss Management							

HighIOPS Solution

Most application, especially Medical's requires small data transfer. Flexxon tailored solutions that facilitate small data activities and provide high random performance efficiently.

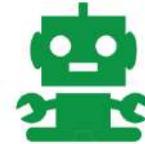

Power Loss Protection

Minimize the risk of data loss due to sudden power loss or unstable power supply. This function is suitable for sleep device application.

S.M.A.R.T Tool

FLEXXON SD card SMART Info Tool can read reliability of SD card by estimating remaining life ratio, good block ratio, erase count etc...

Auto-Read Refreshment

When bit errors are approaching the preset threshold level during read operations. Flexxon firmware will move the data to a new block, and reset the old one.

Advance Wear Levelling

For special O/S, advance wear levelling features will help to ensure wear levelling is performed with every write command. This will greatly increase the life cycle of the cards

WORM MEMORY CARD

- **Tamper-proof** Write-Once-Read-Many solution that **protects sensitive files** from being deleted, modified, or overwritten.
- **Replaces old WORM media** such as CD-R / DVD-R disk storage, optical disk, zip disk, and WORM tape
- Comes in SD and Micro SD Card

Bank and Financial Industries

Protect sensitive financial industry, regulatory authority, and exchange commission records.

Surveillance Camera

Record surveillance, dashcam, event footage from security cameras.

Police Photography

Archive genuine and tamper-free police photography and audio recordings “black box” flight-data recorders.

Electronic Voting

Ensure electronic voting records are recorded and made tamper-proof

Court Proceedings

Secure legal files for trials and depositions

Cash Register Data Logging

Record financial data from cash registers for tax collection purposes

Medical Industry

Track patient interactions with physicians and other health-care professionals. Also, retain confidential patient treatment data from medical devices such as AED Trainer, DICOM, and Medical Imaging systems.

Non-profit organisation

Stores the financial transactions periodically for legal purposes.

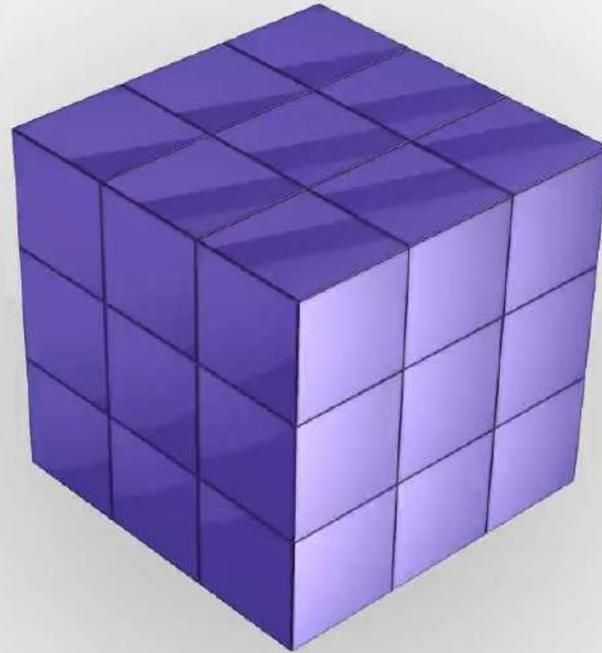

University

Keep confidential records digitally for their students to prevent any cases of physical records being destroyed or tampered.

Businesses

Keep unalterable records so that employees cannot change its data to commit any fraud.
