OEM CATALOGUE

Ready for the Future

Since 1930, our guideline “The safe contact worldwide” has been a synonym both for high-quality and innovative connection technology for luminaires and electrical appliances as well as for a reliable, quick and individual customer care worldwide.

Also in the digital age, we will continue to follow our philosophy. One of the results are many product innovations with which you are well equipped for the future. The new printed catalogue you now hold in your hands is the ideal supplement to all information that is now available in digital form. It provides an outline of our broad product range of connection solutions for our target industries, highlights the most important advantages for customers and navigates with pictures and headlines to more than 2,000 articles which you can find on our homepage.

Bergisch Gladbach, March 2020

The Company 6

PRODUCT GROUPS

SMD Terminal Blocks

The product range for the safe connection of LED modules

8

Building Installation Connectors AC 166®

Flexibility, safety and cost effectiveness in installation

12

Building Installation Connectors AC 164

The compact system for installations with little space

18

Connectors AC 162

The system for LED and low-voltage applications

24

Connectors 160/163

The alternative connection solution for appliances, drives and luminaires

28

Circular Connectors/Terminal Blocks IP68

The safe connection solution against water and dust

32

Lighting Connectors IP66

Simple, safe and cost effective

38

Continuous Row Lighting System LEDtrack

The complete system for all functions on continuous row lighting systems

44

Screwless Terminal Blocks

Push – press – play
The easy and quick connection

50

Screw Screwless Terminal Blocks

The “hybrid solution” in the connectors world

54

Screw Terminal Blocks

Proven connection of electrical appliances and luminaires

58

Fused Terminal Blocks

Protection of sensitive luminaires and appliances

62

Transformer Connectors

Safe connection of small and control transformers

66

PCB Terminal Blocks/Connectors

Pinpoint accuracy in spacing and special solutions – our strength

70

COMPANY

The Safe Contact Worldwide

WHY PRODUCTS MADE BY ADELS CONTACT?

Because we are the way we are! Some people call it culture or philosophy. We just call it being close to the customer.

Our particular competence is the rapid development of customised solutions of superior connection technology. Experience and expert knowledge help to find alternatives for you and to put the smartest solution into practice. Here, we are true to our guiding principle of "fit-for-purpose", considering that the most expensive product is not always the better one.

Close contact to our customers is an essential part of our success. People in the business take immediate, personal and reliable care of your questions and concerns.

SMD TERMINAL BLOCKS

The Product Range for the Safe Connection of LED Modules

testing aperture and conductor release

pick & place area $\varnothing 3 \text{ mm}^2$

extremely reduced
total height of 3.45 mm

connection of solid or flexible
conductors up to 0.75 mm^2

FOOTPRINT SMDflat 345

APPLICATIONS

- LED modules
- printed circuit boards
- power supply

ADVANTAGES

- minimal shadow effect due to reduced total height
- minimal discolouring due to the reflow soldering process
- safe processing on automatic luminaire assembly machines

PRODUCT RANGE

SMD Terminal Blocks

BUILDING INSTALLATION CONNECTORS AC 166®

Flexibility, Safety and Cost Effectiveness in Installation

suitable strain relief with
different cable outlets

screw, screwless or solder terminal

mechanical coding for
different applications

fixing by
screw or rivet

100 % PROTECTION AGAINST INCORRECT PLUGGING

- = no plugging when rotated by 180 °
- = no one pole plugging
- = no plugging of different numbers of poles
- = no plugging when shifted aside

APPLICATIONS

- furniture
- displays
- luminaires
- booth construction
- retail lighting
- building installation

BUILDING INSTALLATION CONNECTORS AC 166®

ADVANTAGES

- error-free installation according to EN 61535
- “plug & play” without dismantling, stripping, manual connecting or extensive re-working
- 30 % lower costs, 70 % less time
- modular system for luminaires, appliances and socket outlets, pre-assembled cables and distributors

PA 6/6 UL 94: V-2	T 70 °C EN 61535	0.5 - 2.5 mm²	IP20 IP40

BUILDING INSTALLATION CONNECTORS AC 164

The Compact Building Installation Connectors for Installations with Little Space

outlet for various cable types and diameters

countersunk head machine screws

compulsory locking with hook and eye

compact dimensions

various mechanical codings

2 to 5 pole

APPLICATIONS

- retail lighting
- object lighting
- interior lighting
- advertising lighting
- switch cabinet lighting
- displays
- booth construction

BUILDING INSTALLATION CONNECTORS AC 164

ADVANTAGES

- little brother of the successful AC 166® series – about half the size
- ideal for applications with limited space such as for small luminaires and appliances
- “plug & play” allows error-free and extremely fast connection according to EN 61535
- modular system for flexible use

		16 A 250/400 V	PA UL 94: V-2	T 70 °C EN 61535

CIRCULAR CONNECTORS/TERMINAL BLOCKS IP68

The Safe Connection Solution against Water and Dust

safe IP68 connection by fitting gaskets

APPLICATIONS

- tunnel lighting
- green house lighting
- street lighting
- industrial lighting
- garden and park illumination

ADVANTAGES

- safe connection without the use of cast resin, gel or heat shrink tube
- plugs and sockets for “plug & play”
(no cutting to length, stripping, connecting)
- connectors as cost-effective alternative for one-time connection of luminaires

Available in Germany, Austria & Switzerland.

LIGHTING CONNECTORS IP66

Easy, Safe
and Cost-Effective

APPLICATIONS

- moisture-proof luminaires
- industrial lighting
- parking garages
- warehouses

ADVANTAGES

- extremely quick connection of moisture-proof and industrial luminaires
- no need to open the luminaire
- cost-effective by using fewer components

		16 A 400 V	PA 6, TPE UL 94: V-2

Protection of Sensitive Luminaires and Appliances

fuse holder

fixing by screw or rivet

1 to 5 pole

WIRE PROTECTOR (DS) FOR FLEXIBLE CONDUCTORS

UNPROTECTED

APPLICATIONS

- valuable luminaires
- fully-automatic coffee machines
- control systems for storage water heaters

ADVANTAGES

- protection via live conductors
- for 3 dimensions of standard glass fuses
- connection of conductors from 0.5 to 10.0 mm²
- special versions for PE contact to the base plate

			16 - 41 A 400 - 500 V
PA 6/6, PA 6/6 GW UL 94: V-2	T 85 °C EN 60598	0.5 - 4.0 mm ²	

PRODUCT RANGE

Fused Terminal Blocks

More information online

WEBSITE

SCREW TERMINAL BLOCKS

503 Si/ .. 2.5 mm²

1003 Si/ .. 4 mm²

1 to 5 pole

SCREW SCREWLESS TERMINAL BLOCKS

900 Si/ 1

1 pole

interlockable

COVERS

ABK 503/ ..

for terminal blocks 503 Si

FUSED TERMINAL BLOCKS

VARIANTS

- further insulating materials PA
- pre-assembled fuses
- raised bases allowing longer creepage distances
- printing
- center stop (MDS)

TRANSFORMER CONNECTORS

Safe Connection of Small and Control Transformers

testing aperture

holes for marking labels

nominal cross section
4.0 mm² and 16 mm²

1 and 2 pole,
partly interlockable

snap-on to the winding frame

APPLICATIONS

- transformers
- mains filter
- testing equipment

ADVANTAGES

- external connection optionally with or without screws
- reliable fit on the winding frame
- connection of conductors from 0.5 to 16.0 mm²
- connection provided for blade receptacles

SPRING CAGE (SCREWLESS)

LIFT TERMINALS

			32 - 76 A 600 - 750 V	PA 6/6 UL 94: V-2
T 85 °C EN 61558	0.5 - 16 mm ²			

PRODUCT RANGE

Transformer Connectors

interlockable

MARKING LABELS

BZ 14 ..

PCB TERMINAL BLOCKS/CONNECTORS

Pinpoint Accuracy in Spacing and Special Solutions — our Strength

horizontal or vertical solder pins

dovetail for interlocking

nominal cross section 1.0 to 2.5 mm²

2 to 24 pole

APPLICATIONS

- printed circuit boards
- LED drivers
- automation technology
- measurement and control technology

PCB TERMINAL BLOCKS/CONNECTORS

ADVANTAGES

- pinpoint accuracy in spacing and long life by PBT material
- numerous variants
- connection of conductors from 1.0 to 4.0 mm²
- safe and PCB-friendly connection by lift terminals

LIFT TERMINALS

UNPROTECTED

WIRE PROTECTOR (DS)

			13.5 - 24 A 130 - 250 V
PBT UL 94: V-0	T 60 °C EN 61984	0.5 - 2.5 mm ²

TECHNICAL INFORMATION

Characteristics of the Insulating Materials

Application		Particular Properties
POLYAMIDES		
PA 6	connectors and connecting systems of the standard line e. g. AC 164 and AC 166®	high insulation, shatter-proof, asbestos and halogen-free, corrosion-proof, resistant against weather, ozone, UV radiation, solvents, oil, fat
PA 6.6		
PA 6.6-HT		
connectors and connecting systems for use in periodically high ambient temperatures e. g. 500 HT		
PA6-GW	terminal blocks and connectors for use in household appliances and similar purposes to EN 60 335-1 e. g. 503 Si	high fire resistance GWIT 775°C/ 0.8-1.3 fibre-glass-free, halogen-free
OTHERS		
PPA-GF Polyphthalamide	SMD terminal blocks e. g. SMDflat 345	resistant against high soldering temperatures (reflow soldering)
PBT Polybutylene	PCB terminal blocks, PCB connectors e. g. GSK 840	dimensionally stable, true to spacing
PC Polycarbonate	Strain reliefs ZEL 110 and ZEL 900	high dimensional accuracy, high weathering resistance, resistant against high-energy rays (UV)
PORCELAIN/ STEATITE	connectors for use in periodically extremely high ambient temperatures e. g. 131 or 157	high temperature resistant, even when touched, resistant to age and UV radiation
TPE Thermoplastic Elastomer	gaskets against the ingress of dust and moisture e. g. AC 169 and LCS 75	high protection against dust and moisture
PS Polystyrene	marking labels e. g. 500 BZ	extremely fine contours, can be produced with flat surfaces and straight edges.

TECHNICAL INFORMATION

IP Codes

PROTECTION CODE	Against the Intrusion of Dust First Digit IP_x	Against the Intrusion of Water Second Digit IPx_
0	unprotected	unprotected
1	protected against solid objects dia 50.0 mm and more	protected against dripping water
2	protected against solid objects dia 12.5 mm and more	protected against dripping water when the enclosure is tilted up to 15°
3	protected against solid objects dia 2.5 mm and more	protected against spraying water
4	protected against solid objects dia 1.0 mm and more	protected against splashing water
5	protected against dust	protected against water jets
6	dust tight	protected against powerful water jets
7	-	protected against harmful effect when being temporarily immersed in water
8	-	protected against harmful effect when being permanently immersed in water
9K	-	protected against close-range high pressure, high temperature spray downs

TOLERANCES	DIN 7168		general tolerances for linear and angular dimensions and geometrical tolerances (not to be used for new designs)
	DIN ISO 2768 part 1		general tolerances; tolerances for linear and angular dimensions without individual tolerance indications
	DIN ISO 2768 part 2		general tolerances; geometrical tolerances for features without individual tolerances indications
	DIN 16742		Plastics moulded parts - Tolerances and acceptance conditions
	DIN 40680 part 1		ceramic components for electrical purposes; admissible tolerances
	DIN 40680 part 2		ceramic components for electrical purposes; form tolerances

RELEVANT GLOW WIRE TESTS

to EN 60335-1:

Standard for household and similar electrical appliances

- further glow wire tests for mouldings that are positioned 3 mm next to current carrying parts
- test carried out on a component
 - › to EN 60695-2-11 “GWT 750 °C”
 - › temperature of glow wire 750 °C
 - › contact time of glow wire 30 seconds
 - › flame extinguishes within 2 seconds max.
- (alternatively) test carried out on a test board
 - › EN 60695-2-13 “GWIT 775 °C”
 - › temperature of glow wire 775 °C
 - › contact time of glow wire 30 seconds
 - › flame extinguishes within 5 seconds max.

to EN 60998-1:

Connecting devices for low voltage circuit

- test on mouldings that keep current-carrying parts in their position
- obligatory tests in order to obtain a VDE certificate for connecting devices
- test carried out on a component
 - › temperature of glow wire 850 °C
 - › contact time of glow wire: 5 seconds
 - › flame extinguishes 30 seconds after removal of the glow wire
