

40 Years of Connector Manufacture

Winslow started manufacturing connectors in the mid-1970s when we re-created an obsolete TO Socket for Flight Rediffusion, Crawley. This quickly developed to a range of stamped & formed contact I.C. sockets with a market share that required manufacturing rates of 70 pins per second followed by the development of a screw machined pin socket manufacturing line. Today we have a broad-line of Connectors available:

DIL / SIL / PLCC / PGA / TO Sockets.

Solder Tail / SMT Headers & Header Sockets; 0.80 / 1.00 / 1.27 / 1.778 / 2.00 / 2.54mm pitch.

Shorting Links.

Solder Cup / Through Board / Slotted Pin Headers.

Box Headers with / without latch. SMT / Solder Tail. 1.27 / 2.00 / 2.54mm pitch.

SIMM Sockets.

DIN Connectors.

FPC Connectors: SMT / Solder Tail / 0.50 / 1.00 / 1.25mm pitch.

Mini USB, USB, HDMI

Wafer Connectors.

Serial ATA (SATA).

Spring Pin Connectors.

In 1982 Winslow purchased Jermyn Manufacturing and we continue to manufacture the Jermyn range of Transistor Sockets, Mounting Pads, Bushes, Heatsinks, TO Clamps and Insulating/Heat Transfer Washers.
